SOC II COMPLIANT

Global colocation, live and ready for you to start trading today.

Our global presence creates low-latency access to exchanges, dark pools, and FX venues to consume market data and order execute your orders. Our existing global footprint means that you'll be up and running in days or weeks, not months.

Start trading with the space and power you need today and then flexibly scale up or down as your business grows or as your customers' needs change.

We offer a variety of hosting options in all our data centers suitable for the smallest proprietary firms or the largest global banks.

Our extensive footprint offers the freedom to scale quickly from a single server and shared PicoNet™ connections- to multiple cabinets with dedicated connectivity optimized to your specific needs.

Our in-country certified experts are there to build, configure, and monitor your infrastructure 24/7.

PICO INFRASTRUCTURE SOLUTIONS

Device Management

Build, configure, monitor and manage servers, offloading the responsibility of setup and maintenance

Intellihands Services

An extension of your team, with highly trained Pico experts on-site

Infrastructure Analytics

We operate and maintain collocated infrastructure in the world's most important financial data centers

Pico provides ultra low-latency venue access to ensure the fastest execution possible, while offering customers visibility of their performance with best-in-class analytics.

Pico's Layer 1 switching technology delivers market-leading, cost-efficient, ultra low-latency access across our key venues.

Our offering is optimized for clients and provides an important competitive edge for many latency-sensitive trading strategies.

The standard Layer 3 access executes trading strategies in a round trip latency of 760ns, whereas Pico's Layer 1 access achieves this with more certainty and in a fraction of the time at 140ns. Pico's Layer 1 connectivity can reduce overall tick-to-trade latency.

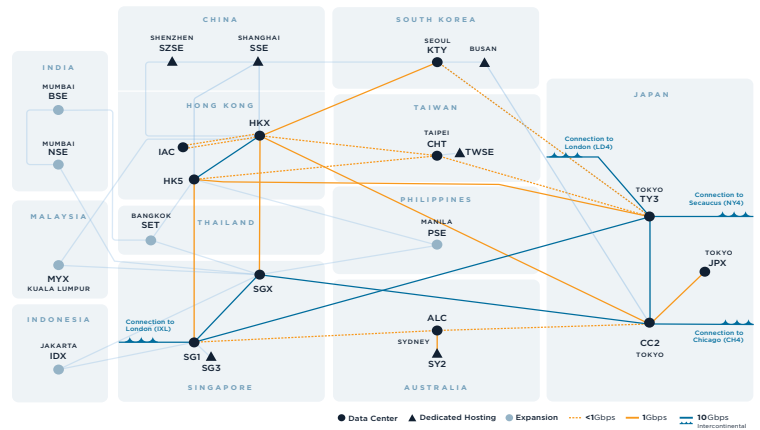

FEATURES

- Pico offers **real-time performance monitoring and end of day reports powered by Corvil** to substantiate marketing claims and provide full transparency around performance.
- Our Arista Layer 1 solution has been extensively tested by our Engineering teams for **maximum performance, scalability and compatibility** with our operations platforms.
- Our solution combines equivalent performance to competitors with our **24/7 follow-the-sun and best-in-class Service Operations** and support teams.

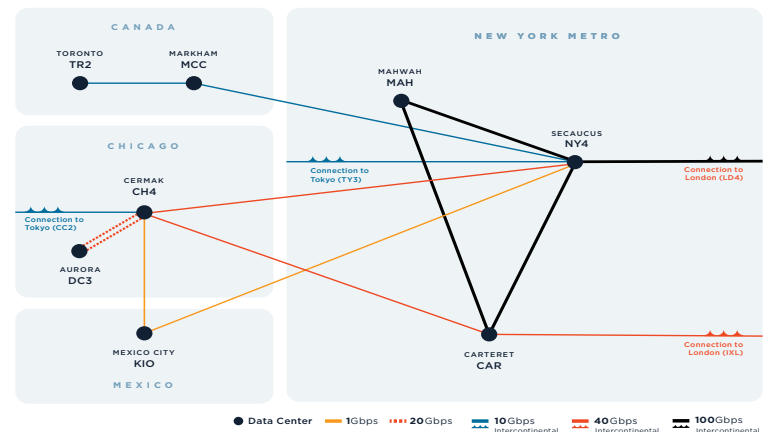

ABOUT PICO

Pico provides technology services to financial markets clients who demand cutting-edge solutions delivered quickly and accurately but also need flexibility and agility to respond to ever-changing market conditions.
